🪪 Objectives

Aspiring to work in a dynamic environment as a Software Engineer where I can use my analytical skills and creative thinking abilities to create robust solutions.

💼 Professional Experience

08/2020 – 08/2021
Shirpur

GOBIOSERVICES, *Software Developer* ⌝

I worked for GoBioService as a Web Developer. I spent 1 Year with the organization. I worked on several projects.

1) GoBioServices Website:- As a web developer, I created a responsive and user-friendly website from scratch for GoBioService. I handled both front-end and back-end development, configured an email module and developed an order form to enhance its functionality. I successfully launched the website, meeting all client requirements and demonstrating my ability to deliver high-quality work independently.

2) GoBio Desktop Application:- I developed a desktop app with C#.net, MySQL, and Windows Form. It helps organizations manage their order records and transactions. The software is user-friendly and fulfills specific needs. It enables accurate tracking of orders and transactions.

09/2021 – 01/2022

ProTuple IT Venture, *Software Developer - Intern* ⌝

I interned at ProTuple for six months, where I developed the Vyapar Application using DotNet. I built the front-end and back-end components, including the Admin panel, Purchase module Design, and Backend logic. I also established the SQL table structure for the app, gaining valuable technical skills and hands-on experience in DotNet development.

KrishCompuSoft IT Global, *Associate Software Developer* ⌝

I am working at KCSIT Global. I spent 6 Months with the organization as an Intern. Now I am working as Associate Software Developer in DOTNET. I worked on multiple live projects.

- **GIPL Labor Commissioner Project**

  I was involved in a government project. Specifically, I worked on the Designing and Back-End modules and also created a stored procedure to support the project. Throughout the project, I utilized dotnet Core 6 and PostgreSQL technologies.

- **Form Builder Project**

  I am currently involved in a government project where contractors can apply different schemes. My focus is on the Graph module, and I am responsible for addressing any issues that arise during the project's implementation.

- **MagnitudeGold Project**

  This product is designed to assist both small and large commercial businesses in creating and managing their own websites and customer data. As part of this project, I am responsible for working on the user-facing frontend technology, as well as working on highly complex stored procedures and robust backend logic to ensure the product's functionality.

Skills
